ONEIDY CONSTANZA GARCIA

AI Application Engineer | Python Software Engineer

Kissimmee, FL | (239) 888-7879 | oneidyconstanzagarcia@gmail.com | linkedin.com/in/oneidy | itsmyfacade.github.io | github.com/itsmyfacade

PROFESSIONAL SUMMARY

AI Application Engineer and Python Software Engineer specializing in LLM-powered applications, retrieval-augmented generation (RAG), backend systems, REST APIs, and data engineering. Built and deployed AEGIS using Python, FastAPI, LangGraph, SQL, and AWS Bedrock integrations, with automated testing and GitHub Actions CI/CD. Developed Python ETL and Power BI analytics workflows. Founder and primary technical contributor at ANIMORIGO, LLC, leading application architecture, integrations, and product development.

TECHNICAL COMPETENCIES

AI Applications & LLM Systems: LLM Integration, RAG, LangGraph, LangChain, AWS Bedrock, Amazon Nova, Prompt Engineering, Structured Outputs, Evidence Grounding, Retrieval Evaluation
Python & Software Engineering: Python, FastAPI, Pydantic, REST APIs, Boto3, SDK Integrations, React, Next.js, TypeScript, JavaScript, JSON
Data Engineering & Analytics: SQL, SQLite, PostgreSQL, Supabase, Python ETL, Power BI, ChromaDB, Sentence Transformers, Data Validation, Embeddings
Cloud, CI/CD & Testing: Docker, GitHub Actions, Git/GitHub, Render, Vercel, Pytest, Ruff, Pyright, Automated Regression Testing
Engineering Practices: API Authentication, Access Controls, Error Handling, Root-Cause Analysis, Technical Documentation, AI-Assisted Development

FEATURED ENGINEERING PROJECTS

AEGIS - AI Evidence-Grounded Intelligence System | 2026
Python | AWS Bedrock | LangGraph | LangChain | ChromaDB | SQLite | FastAPI | Docker | GitHub Actions
GitHub: AEGIS Source Code | Live Demo: Interactive Demo

- Architected an evidence-grounded AI investigation platform using LangGraph to coordinate document retrieval, SQL analysis, LLM synthesis, and citation verification.
- Implemented semantic and lexical retrieval, 20 synthetic incident scenarios, and Amazon Nova Micro integration through AWS Bedrock, including structured outputs and evidence-validation safeguards.
- Developed FastAPI endpoints, an interactive investigation interface, Dockerized deployment, and GitHub Actions CI with automated Python testing, Ruff linting, and regression checks.

AEGIS Intelligence Observatory | 2026
Python | SQL | SQLite | ETL | Power BI | Data Validation

- Developed deterministic Python ETL and SQL analytics workflows using validated synthetic investigation records.
- Built a Power BI reporting experience and interactive browser companion for exploring investigation evidence, workflow performance, and operational trends.

PROFESSIONAL EXPERIENCE

Founder & AI Application Engineer | ANIMORIGO, LLC 2025 - Present | Orlando, FL

- Lead architecture and development of a multimodal digital provenance platform using React, Next.js, TypeScript, REST APIs, Supabase, and PostgreSQL.
- Engineer authentication, third-party SDK integrations, structured metadata workflows, data validation, and database persistence.
- Translate product requirements into technical solutions, troubleshoot integration issues, coordinate contributors, and maintain engineering documentation and regression testing.

Inventory Specialist | Norris Furniture & Interiors 2022 - 2023 | Fort Myers, FL

- Coordinated inventory operations, resolved discrepancies, and supported time-sensitive warehouse workflows.

Inventory Specialist | Clive Daniel Home 2020 - 2022 | Fort Myers, FL

- Supported shipping, receiving, inventory accuracy, and warehouse operations during approximately 3× capacity expansion.

EDUCATION & TECHNICAL CERTIFICATIONS

University of Helsinki (Online) - Software Engineering Coursework, 2024 | Java Programming I & II - OOP, Data Structures, Algorithms

freeCodeCamp - Technical Certifications (2024)
Scientific Computing with Python (Jul) | Data Analysis with Python (Aug) | Machine Learning with Python (Aug)
