ONEIDY CONSTANZA GARCIA

AI Application Engineer | Python Software Engineer

Kissimmee, FL | oneidyconstanzagarcia@gmail.com | (239) 888-7879 | linkedin.com/in/oneidy

PROFESSIONAL SUMMARY

AI Application Engineer and Python Software Engineer specializing in LLM-powered applications, retrieval-augmented generation (RAG), API integrations, and full-stack development. Built and deployed AEGIS, an evidence-grounded investigation platform using Python, LangGraph, FastAPI, SQL, and AWS Bedrock integrations, supported by automated testing and GitHub Actions CI/CD. Founder and primary technical contributor at ANIMORIGO, LLC, leading software architecture, application development, and cross-functional product execution.

TECHNICAL COMPETENCIES

AI Applications & LLM Systems: LLM Integration, RAG, LangGraph, LangChain, AWS Bedrock, Amazon Nova, Prompt Engineering, Bounded Workflow Orchestration, Structured Outputs, Retrieval Evaluation, Evidence Grounding
Python & Application Engineering: Python, FastAPI, Pydantic, REST APIs, React, Next.js, Node.js, TypeScript, JavaScript, Boto3, SDK Integrations, JSON, SQL
RAG & Data Engineering: ChromaDB, Sentence Transformers, Semantic & Lexical Retrieval, Embeddings, Document Chunking, SQLite, PostgreSQL, Supabase, ETL, Data Validation, Metadata Management
Cloud, CI/CD & Testing: Docker, GitHub Actions, Git/GitHub, Render, Vercel, Pytest, Ruff, Automated Regression Testing
Engineering Practices & Developer Tools: API Authentication, Access Controls, Parameterized SQL, Error Handling, Root-Cause Analysis, Technical Documentation, Claude Code, Codex

FEATURED AI ENGINEERING PROJECT

AEGIS - AI Evidence-Grounded Intelligence System | 2026
Python | AWS Bedrock | LangGraph | LangChain | ChromaDB | SQLite | FastAPI | Docker | GitHub Actions
GitHub: AEGIS Source Code | Live Demo: Interactive Demo

- Architected and deployed AEGIS, an evidence-grounded AI investigation platform using a bounded LangGraph workflow to coordinate document retrieval, SQL operational analysis, LLM synthesis, and citation verification.
- Engineered semantic retrieval with Sentence Transformers and ChromaDB alongside a lightweight lexical retrieval profile; developed 20 synthetic incident scenarios with evidence references, retrieval diagnostics, and evaluation safeguards.
- Integrated Amazon Nova Micro through AWS Bedrock and LangChain, supporting structured outputs, token-usage diagnostics, error handling, and evidence-coverage validation; implemented deterministic local synthesis for the hosted demo.
- Developed FastAPI REST endpoints, an interactive investigation interface, and a Dockerized Render deployment; implemented GitHub Actions CI with automated Python tests, Ruff linting, compilation checks, and frontend syntax validation.

PROFESSIONAL EXPERIENCE

Founder & AI Application Engineer | ANIMORIGO, LLC 2025 - Present | Orlando, FL
Founded an early-stage technology venture developing a multimodal digital provenance and verification platform. Established the product vision and technical direction, assembled a cross-functional team, and continue to serve as its primary software engineering contributor.

- Lead the architecture and development of a multimodal digital provenance platform, building React/Next.js interfaces, TypeScript application logic, REST API integrations, and Supabase/PostgreSQL data workflows.
- Develop and troubleshoot authentication, database operations, third-party SDK integrations, application configuration, and data-processing workflows across cloud-connected services.
- Design structured metadata extraction, validation, and persistence workflows supporting digital asset records, provenance information, and verification processes.
- Translate product requirements into technical implementation plans, coordinate cross-functional contributors, investigate defects, and maintain technical documentation and regression testing workflows.

Inventory Specialist | **Norris Furniture & Interiors** 2022 - 2023 | Fort Myers, FL

- Coordinated inventory operations, resolved discrepancies, and supported time-sensitive warehouse workflows.

Inventory Specialist | **Clive Daniel Home** 2020 - 2022 | Fort Myers, FL

- Supported shipping, receiving, inventory accuracy, and warehouse operations during approximately 3× capacity expansion.

EDUCATION & TECHNICAL CERTIFICATIONS

University of Helsinki (Online) - Software Engineering Coursework, 2024 | Java Programming I & II - OOP, Data Structures, Algorithms

freeCodeCamp - Technical Certifications (2024)
Scientific Computing with Python (Jul) | Data Analysis with Python (Aug) | Machine Learning with Python (Aug)
